Why Monitoring?

Server Monitoring

With our Real-Time Monitoring cloud-based service you will see real-time statistics for device performance, availability, trending analysis and even SLA adherence from third party providers. You will receive total visibility of your IT real-estate whether it is hosted locally, in the cloud, by us or in your own datacentre.

“

We are a global business with 6 sites across 4 countries and 2 continents. Ventrus have been critical to IT's ability to scale with the business and provide a consistent, highly available infrastructure platform.

Simon O'Sullivan
IT Director, Global Footwear Company

Why Monitoring?

We recognise how critical it is that all of the elements of your network are functioning properly so our monitoring services are geared towards keeping your business running at all times.

Server Room Conditions

Benefit from our environmental monitoring services that eradicate the serious risk of data loss or physical hardware failure through overheating or power loss.

Application Performance

Gain 24/7 access to critical application metrics, helping you achieve increased visibility of application performance and proactive monitoring of key application services.

Server Performance

We can rapidly resolve issues before they escalate and prevent and avoid costly downtime by keeping a constant watch on your servers and devices with multiple monitoring engines.

Supplier Services Uptime

By integrating our real-time monitoring services with your supplier's technologies, we can deliver rapid responses to supplier outages and enable you to track and monitor supplier SLA's and targets.

Capacity Planning

Our capacity planning services determine your service level requirements, analyse your current capacity and then use forecasts of future business activity to determine your future system requirements.

Ventrus also offer:

Support Services

We offer unlimited remote IT support and peace of mind to help your small-medium business remove the stress of IT related problems. Receive reliable and cost-effective IT Support solutions and optimisation when you need it and where you need it, 24/7 if necessary.

Managed Networks

It's not just about hardware and software; it's about understanding your business processes, your goals and your needs. We take responsibility for everything from cabling to complete asset management. Our clients rely on us to manage their infrastructure, benefitting from our professional advice from procurement, installation and dedicated IT support.

Consultancy Services

Ventrus Consultancy Services deliver low risk solutions, ensuring network downtime is minimised. Our approach of future proofing your technology purchasing ensures you build strength and fault tolerance into the heart of your business systems.
